

Handling Specialty has developed a global reputation for successfully delivering custom engineered material handling systems to a wide range of industries.

AGV and MGV

Handling Specialty provides custom automatic (AGV) and manually guided vehicles (MGV) for a wide variety of unique applications in production and manufacturing environments, material handling operations as well as for maintenance, repair & overhaul facilities around the world. These heavy-duty vehicles are employed to reliably, safely and efficiently move raw materials and work-in-process through assembly operations as well as the transport of finished goods through paint, inspection, test and shipping.

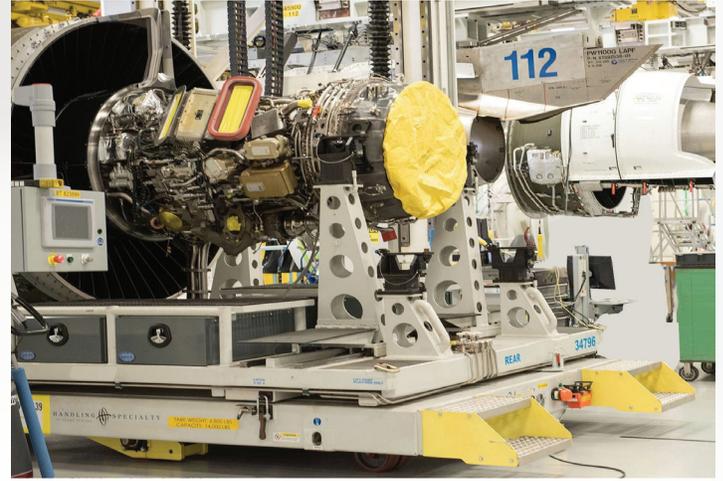

Handling Specialty's flexible and scalable vehicle solutions are custom designed to exceed our client's specific operational requirements and performance specifications. Innovative companies look to Handling Specialty for robust solutions to increase productivity, improve efficiency and enhance safety.

A commitment to excellence and innovation are part of Handling Specialty's culture. AGVs and MGVs from Handling Specialty offer new dimensions of flexibility in the age of IIoT 4.0 connectivity and are well suited to supporting continuous improvement efforts for smart manufacturing operations.

We Build Big Things to Help our Customers Build Big Things

Custom Applications

- Advanced Manufacturing
- Aerospace
- Automotive
- Power-Generation
- Entertainment
- Iron & Steel
- Rail & Transportation
- Material Handling
