

LIFT TABLES FOR AUTOMOTIVE INDUSTRY FANS

SPECIALTY SOLUTION #100

AUTOMOTIVE

- 5,500 lb. capacity, hydraulic actuation, 72½" x 118", 85" vertical travel
- Scissor lift mounted on casters so unit is portable
- Can be moved either manually, or pushed/pulled with a fork truck
- Controlled by hand-held pendant
- Built to withstand significant changes to operating environment
- Six (6) manually adjustable levelling pads and retractable outriggers counter vibration from fans

Handling Specialty custom engineered and manufactured a series of portable but highly stable lift tables that supported large fans in an automotive test facility. The Factory Acceptance Test (FAT) was conducted at Handling Specialty's facilities, using the customer's actual equipment.
