

SAFE AND QUIET PROP/SET LIFT FOR MUSIC CONSERVATORY

SPECIALTY SOLUTION #127

ENTERTAINMENT

- 10,000 lbs. capacity, hydraulic actuation, 119.5" x 189.75", 32" vertical travel
- Hydraulically actuated lock-up legs, double acting cylinders, safety touch bars at ends
- Adjustable mechanical down stops
- Quiet power unit
- PLC used for sequencing movements of the lift and lock-up legs

The University of Cincinnati's Music Conservatory contacted Handling Specialty to custom design and manufacture a hydraulic scissor lift to convey props/set pieces to the conservatory's upper level, while also being used as a 10,000 lb capacity rollover access to the stage in the lowered position. When not in use, this pit-mounted lift remains in the fully raised position.
