

SELF PROPELLING PERSONNEL LIFT FOR RAILCAR ASSEMBLY

SPECIALTY SOLUTION #29

RAIL/TRANSPORTATION

- 4,000 lb capacity, hydraulic actuation, 72" x 212", 130" vertical travel
- Self propelled
- Lift elevates workers for the riveting of side panels
- Carries workers vertically and horizontally along railcar
- Safety features include a guard rail and kick plate system, full bellows and a safety ladder with electronic interlock

Handling Specialty's self propelling 4,000 lb capacity personnel platforms were used to help Thrall Car Manufacturing manufacture railway cars used to transport automobiles during the company's height of production. The lift carried workers vertically and horizontally alongside the rail car allowing them to work at any elevation, while travelling along 200' of track.
