## Rail Turn Tables and Transfer Tables

---

Handling Specialty's transfer tables and turn tables are integral to the rail transportation industry, providing high-efficiency traffic flow between tracks in rail maintenance and repair facilities. These systems are engineered for precision, durability, and long-term performance in environments where uptime and reliability are critical.

With the combined experience of Handling Specialty's extensive history in rail turn table design, transfer table design, construction and our dedicated sales and engineering expertise, our equipment is purpose-built to endure the harsh and demanding conditions found in railway applications. Every unit is custom engineered to accommodate the rugged operating environments typical of rail shops.

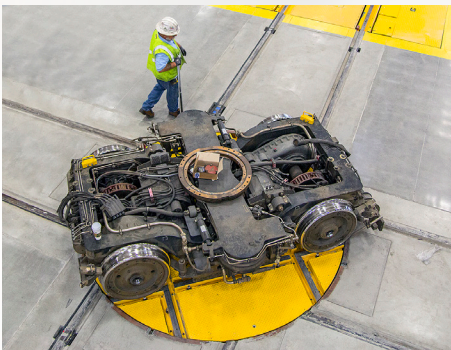

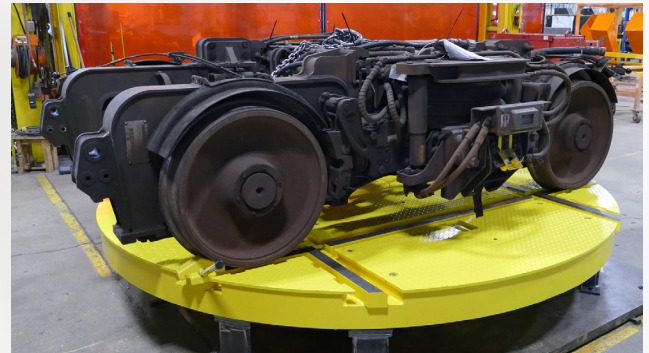

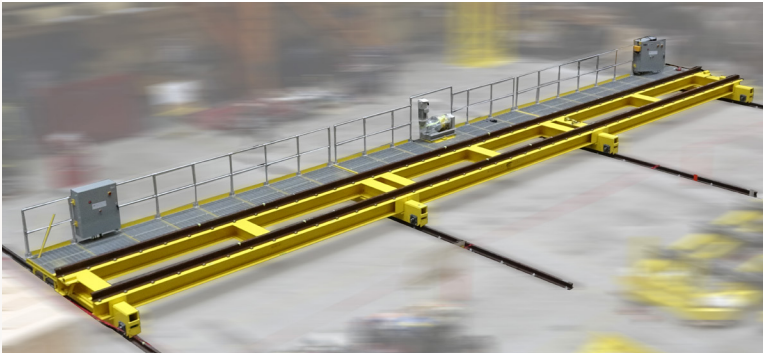

Handling Specialty provides a full-service lifecycle approach to every project. From concept development and custom engineering to manufacturing, installation, and commissioning, we ensure every solution meets the exact requirements of our clients. Additionally, we offer comprehensive maintenance services and OEM parts support to extend the life of our equipment and maximize operational efficiency.

**We Build Big Things to Help our Customers Build Big Things**

## Designs Based on Customer Requirements Such As:

- Large capacities
- Sizes (pit or a non-pit design)
- Indoor or outdoor use
- Covered or uncovered
- Cab and/or wireless controls
- Manual, semi-automatic or fully automatic operations
- Advanced safety packages
